

Problem : Overpopulation

Consequences : Destroy the food chain

Solution 1 : ~~Control~~ Establish the law to prevent birth

Solution 2 : ~~Make~~ Plan for new birth baby take contraceptive measures.

Conclusion : Take action

Problem with the earth

I'm writing this letter in an effort arouse public concern about overpopulation.

Nowadays, there are nearly 7.2 billion people on the earth and the population is still growing quickly. If this trends continues, the eco-system will soon overloned and get an irreparable damage.

To help this for this problem, we expect the government, not only our country, but also the United Nations, to establish new laws to control the growth of the population, and exploit new land, develop outer space and colonize new planets.

For individuals, we ~~can~~ need to learn more about contraception and consider to give birth to a new baby carefully.

I sincerely hope everyone will take action to protect our earth.

12. element n.

1) 要素=

a key element 一个关键因素

The movie about the tsunami had all the elements of a good thriller.
